1 Introduction

1.1 General

The purpose of these notes is to guide runners through the PSP speedrun of the game. This document covers the base route that you have to follow, with additional helping material regarding negotiations and items that you have to pick up.

1.2 Settings

Before the run you have to adjust the settings in Config menu:

- **Message Speed:** Fast - for faster text skipping;
- **Voice Volume:** mute - muting voices allows you to skip character, bosses and personae quotes - when they talk during fights, negotiations and awakening;
- **Cursor Memory:** ON - makes menuing during the run more convenient, helps with faster guarding;
- **Cut-Ins:** OFF - skips character cut-ins during Fusion Spell cast.

Your Config screen should look like this (you can adjust other settings to your liking):

- **NOTE:** Difficulty can be set later when selecting New Game.

1.3 Useful tips

1.3.1 Movement

- Fastest way of movement in the game - running at a 45° angle using analog stick (using D-pad makes Tatsuya walk instead of running). To turn the camera at an angle use Left / Right triggers on your controller.
- Moving around the city is also faster with analog stick.
- You can get to the top / bottom of the menu using D-pad Left / Right.

1.3.2 Text Skipping

- There is no button to auto-skip text in this game - use X or O to mash through it.
- Mashing circle prevents you from accidentally confirming wrong dialogue options when prompted.

1.3.3 Battle

- If you have one of the character's turn still in queue before enemies start attacking - you can use that turn to set Guard for other characters, even if they had their turns already. Use it to significantly reduce damage during boss fights.
- If you want one character to stay alive and others to die, it's faster to do it using the Set Turn Order command: set the character you want to stay alive to Guard, and ones that you want to die - to Attack. Make a turn with character that is guarding and stop - go to Set Turn Order and put that character into top slot again. This will force enemy's turn sooner making it attack your team again and will skip your teammates turns, leaving them without guard for enemy's attack. This way you can also avoid unnecessary damage from your team so you don't accidentally kill the boss too early.

1.3.4 Other

- Choosing 'Leave' option in the store (like Satomi Tadashi Drugstore) or other city locations is faster than walking to the door on your feet.
- Always choose first dialogue option unless explicitly stated otherwise.
- Always guard first enemy turn unless explicitly stated otherwise. When you done with your attack turns - use last of your team mates turns to guard everyone before enemy's turn.
